***Continued Examination Under 37 CFR 1.114***

The prosecution for this application is being re-opened after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action.

***Allowable Subject Matter***

Claims 1-41 are allowed.

The following is an examiner's statement of reasons for allowance:

The provision for — *a computer implemented method of updating an interactive application broadcast from a broadcast system to a reception device over a transmission medium, the method comprising:*

*receiving at the broadcast system a broadcast signal including at least one record of a first interactive application;*

*selecting a second interactive application, and broadcasting records of the second interactive application to the reception device in place of at least some of the records of the first interactive application, for execution of the second interactive application by the reception device;*

*receiving at the broadcast system in the broadcast signal one or more additional records of the first interactive application; and*

*broadcasting from the broadcast system selected ones of the additional records to the reception device, for execution of the second interactive application in conjunction with the additional records*

--- wherein all the features previously described are combined in one singular embodiment, is not fairly taught or suggested by the prior art of record.

The Examiner finds particular novelty in the broadcast system capabilities as described in the Applicant Specification (Figures 1, 3, 7, and 13; Page 14, Lines 28-30; Page 20 Line 17 to Page 21, Line 13; Page 22, Line 7 to Page 23, Line 15; Page 48, table 10; Page 49, Table 1; Page 50, table 12; Page 35, Line 4 to Page 37; Page 54, Line 28 to Page 29, Line 17; Page 60, Line 12 to Page 63, Line 8) wherein the said broadcast system is able to selecting a second interactive application, and broadcast records of the second interactive application to the reception device in place of at least some of the records of the first interactive application, for execution of the second interactive application by the reception device; and further receiving at the broadcast system in the broadcast signal one or more additional records of the first interactive application; and broadcasting from the broadcast system selected ones of the additional records to the reception device, for execution of the second interactive application in conjunction with the additional records.

Art Unit: 2144

Howe disclosed switching between television programs, such as to an interactive program session from another program. However Howe did not disclose *receiving at the broadcast system in the broadcast signal one or more additional records of the first interactive application; and broadcasting from the broadcast system selected ones of the additional records to the reception device, for execution of the second interactive application in conjunction with the additional records.*

Based on the recommendation of the BPAI, the Examiner concludes that in Howe the ICA itself is not an interactive application but a trigger sensed by the set top box to signal it to generate the interactive button. Howe only teaches transitioning between an analog based television program to a second program, particularly an interactive program, and only in response to a set top box user's action. The ICA or icon of Howe is not an interactive application.

Filepp disclosed retrieving records concerning interactive applications made up of objects that include data and program instructions required for generating the application at the reception system. However Filepp did not disclose *receiving at the broadcast system in the broadcast signal one or more additional records of the first interactive application; and broadcasting from the broadcast system selected ones of the additional records to the reception device, for execution of the second interactive application in conjunction with the additional records.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
